

Assalamualaikum and Salam Sejahtera.

Greetings and Happy New Year 2021. I take this opportunity to express my appreciation to all Malaysians, especially rubber industry's players and smallholders who have been very supportive of MRB. Despite the various challenges throughout 2020, with the cooperation of all parties, the rubber industry has been able to overcome it and able to improve its performance in certain sectors. MRB has also successfully introduced new innovations and won several awards at the national and international platform.

It is hoped that 2021 will give a bright chapter and phenomenal success to the rubber industry. Many research activities, technology transfer and services to the industry that have been planned to enhance more innovative products and improvements in the upstream and midstream sectors.

I hope this website will continue to provide useful information to all and serve as a medium of interaction between MRB and all stakeholders.
